

The 2020 LA Cancer Challenge Honorary Medical Chair is Dr. Hines of UCLA

While the 23rd Annual LACC Walk/Run will be virtual, supporting our medical and research community is more important than ever. The Hirshberg Foundation is thrilled to announce our [2020 LA Cancer Challenge Honorary Medical Chair](#) is Dr. O. Joe Hines! Dr. Hines is nationally renowned in the field of pancreatic surgery. He is the esteemed [Chief of General Surgery at UCLA's](#) David Geffen School of Medicine and Director of the General Surgery residency Program. Dr. Hines is on the team of the UCLA Agi Hirshberg Center for Pancreatic Diseases and a member of the Hirshberg Foundation's Scientific Advisory Board.

Dr. Hines is more than a doctor to his patients and countless families touched by pancreatic cancer. He is a part of our Foundation family, committed to our mission and dedicated to this community. He continues to be a guest speaker at our Annual Symposium on Pancreatic Cancer, speaking on topics from [personalized medicine and tumor testing](#) to [advances in pancreatic surgery](#) and a [team approach for pancreatic cancer](#). He attends Agi Hirshberg's intimate backyard BBQ event for patients and caregivers, spending time with people one-on-one to answer questions and listen to their stories. He has also attended the LACC as a member of the UCLA Surgery and Health Sciences Team, setting an example of how important it is to answer a call-to-action as both a doctor and a member of the LACC family.

We thank Dr. Hines for filling this important role as LACC Honorary Medical Chair and thank him for participating in our Virtual LACC Walk/Run on Sunday, October 25, 2020!

More about Dr. O. Joe Hines

Dr. Hines is the Chief of the Division of General Surgery at UCLA where he has served as a professor of surgery since 1997. Dr. Hines is a nationally renowned scholar in the areas of pancreatic surgery, complex abdominal surgery, and advanced laparoscopic surgery. As the Director of the General Surgery residency program at UCLA, Dr. Hines has overseen the training of a generation of young surgeons. A true master surgeon who has also authored over 200 scientific manuscripts and book chapters and whose research has been consistently funded by NIH.

August is National Wellness Month

It's National Wellness Month – a perfect time to re-introduce self-care into our daily lives. As we all face extraordinary challenges in 2020, the Hirshberg Foundation is offering resources, webinars, fitness activities and tools to support your mind and body health. In August, we'll share several topics that will inspire and motivate – here's to a healthy August!

Resources for the Mind:

CANNABIS AND ONCOLOGY: WHAT DO WE KNOW?

Patient & Family Webinar Series

[Join us on August 28th with Dr. Noah Federman](#) to learn more about cannabis and oncology. In Dr. Federman's clinical oncology practice, he uses cannabis and cannabinoid compounds as adjunctive therapies and has a keen interest in how they can help patients. He will share the science behind the many anecdotal stories in this ever-emerging field.

BREAKING UP WITH PANCREATIC CANCER: SURVIVOR STORIES

Patient & Family Webinar Series

Two incredible long-term survivors share their stories and tips for taking a wellness approach with pancreatic cancer. Wendy Hammers, an actress, speaker, and 5-year survivor leads a discussion alongside Marisa Harris, a life coach and 21-year, stage-4 pancreatic cancer survivor. [Learn about setting your own healthy path](#) and how to get yourself in the right mental space to tackle any life change during diagnosis and beyond.

COPING SKILLS FOR THE ENTIRE COMMUNITY

Tools and Tips During COVID-19

During this time of uncertainty, stress levels can skyrocket, especially for cancer patients. Emotional well-being is a

critical piece of the healing process, so now, more than ever, it is essential to have [coping skills](#). We turned to Elizabeth Cleary, PhD, Licensed Clinical Psychologist at the Simms/Mann UCLA Center for Integrative Oncology, to lead an [interactive webinar](#).

MANAGING THE EMOTIONAL JOURNEY

Symposium on Pancreatic Cancer

Dr. Annette Stanton, PhD, has significantly contributed to the Hirshberg Foundation's Symposium for Pancreatic Cancer as a guest speaker. In her ["Managing the Emotional Journey"](#) Symposium video, she discusses how important it is to understand the emotional journey that cancer patients and loved ones experience once diagnosed with pancreatic cancer. As a Professor of Psychology and Psychiatry/ Biobehavioral Sciences, Stanton has researched factors that promote or impede psychological and physical health in adults and couples undergoing chronically stressful experiences. She then translates her findings into action by developing and testing approaches to enhance psychological and physical health over the course of the cancer trajectory.

Resources for the Body:

COOKING HEALTHY WITH DR. LI

Cooking Class Video & Recipes

[Symposium speaker Dr. Zhaoping Li](#), the Director of the UCLA Center for Human Nutrition, and Chef Claire Hansen of Sur la Table gathered with survivors, caregivers and instructors cook up [healthy recipes](#) including Lemon-Barley Pilaf with Chicken and Thyme, Oven-Roasted Cod and Strawberry Smoothies. Before you start cooking these delicious recipes, check out our newest Purple E-Store item, a [Never Give Up](#) apron benefiting pancreatic cancer research!

TOUR DE PIER

Join Us for a Virtual Tour de Pier on September 13, 2020

Tour de Pier is back, in a whole new way! On September 13, 2020, we're going virtual. Your [registration](#) will help ensure that our three charities can continue to provide crucial resources to those facing cancer. Plus, since we're virtual, we have options to ensure that everyone can get involved.

23rd ANNUAL VIRTUAL LA CANCER CHALLENGE

Walk/Run Any Time, Place, or Pace you Choose

The 23rd Annual [Virtual LA Cancer Challenge Walk/Run](#) on Sunday, October 25th will now take place nationwide at any time, place or pace you choose! We've got plenty of resources & ideas to customize your participation, a Purple Spirit Kit to get festively purple, a [Virtual FB Group](#) to share ideas and Ambassadors to inspire and lead the way. Your commitment and passion to find a cure burns bright and our LACC walk/run is when we shine the brightest. Learn More about our virtual event resources and register today!

LEARN THE RISKS & SYMPTOMS OF PANCREATIC CANCER

People with certain risk factors may be more likely than others to develop cancer of the pancreas. Pancreatic cancer symptoms are often barely noticeable or could be associated with other medical conditions. It is crucial that we all have a better understanding of [how the pancreas functions](#), what puts [those at higher risk](#), what all of the [known risk factors](#) include and the [symptoms](#) that could indicate cancer. We share these resources and tools in an effort to prevent and detect pancreatic cancer early.

HIRSHBERG TRAINING TEAM

Train for the LA Marathon, honor a loved one and cross the finish line

The iconic LA Marathon is a rewarding and memorable race experience as you run from Dodger Stadium to Century City's Avenue of the Stars! Training is a commitment to your mental and physical health, a great reason to get active, and a priceless opportunity to honor a loved one and raise funds research and patient programs. Plus, we've got great fundraising prizes and HTT gear to help motivate you. With training options that fit even the busiest of schedules, there's nothing stopping you from making the commitment to cross the finish line on Sunday, March 21, 2021. [Register today!](#)

At the Hirshberg Foundation we are committed to supporting the health and wellness of our patients. This National Wellness Month, help **support these services benefitting the pancreatic cancer community by making a [much-needed donation](#) today!**

Cannabis and Oncology: What do we know?

Cannabis has been used as medicine for thousands of years across the globe. It was only in the early 20th Century that regulations were put in place to classify it as an illegal substance in the United States. Cannabis was officially outlawed at the federal level in the US in 1970. With the passage of California's Proposition 215 in 1996, cannabis for medical use has become increasingly popular. In 2012, states in the US began to legalize cannabis for recreational use. Today, there is more and more research being done to fully understand the medical and health benefits of cannabis.

For the cancer patient, [cannabis](#) has a number of potential benefits, especially in the management of symptoms. Many scientists and doctors tout the benefits of cannabis in managing the side effects of chemo and radiation therapies such as nausea, vomiting, pain, insomnia, and depression. The patients we are in contact with, often share how cannabis has helped them with various symptoms during and after treatment.

In a [study presented](#) at the 2019 annual meeting of the [American Society for Clinical Oncology](#) (ASCO), it was revealed that an overwhelming majority of oncologists strongly support and recommend the use of medical marijuana for cancer patients. The problem is that almost half of them feel they are not qualified to prescribe it as part of the treatment.

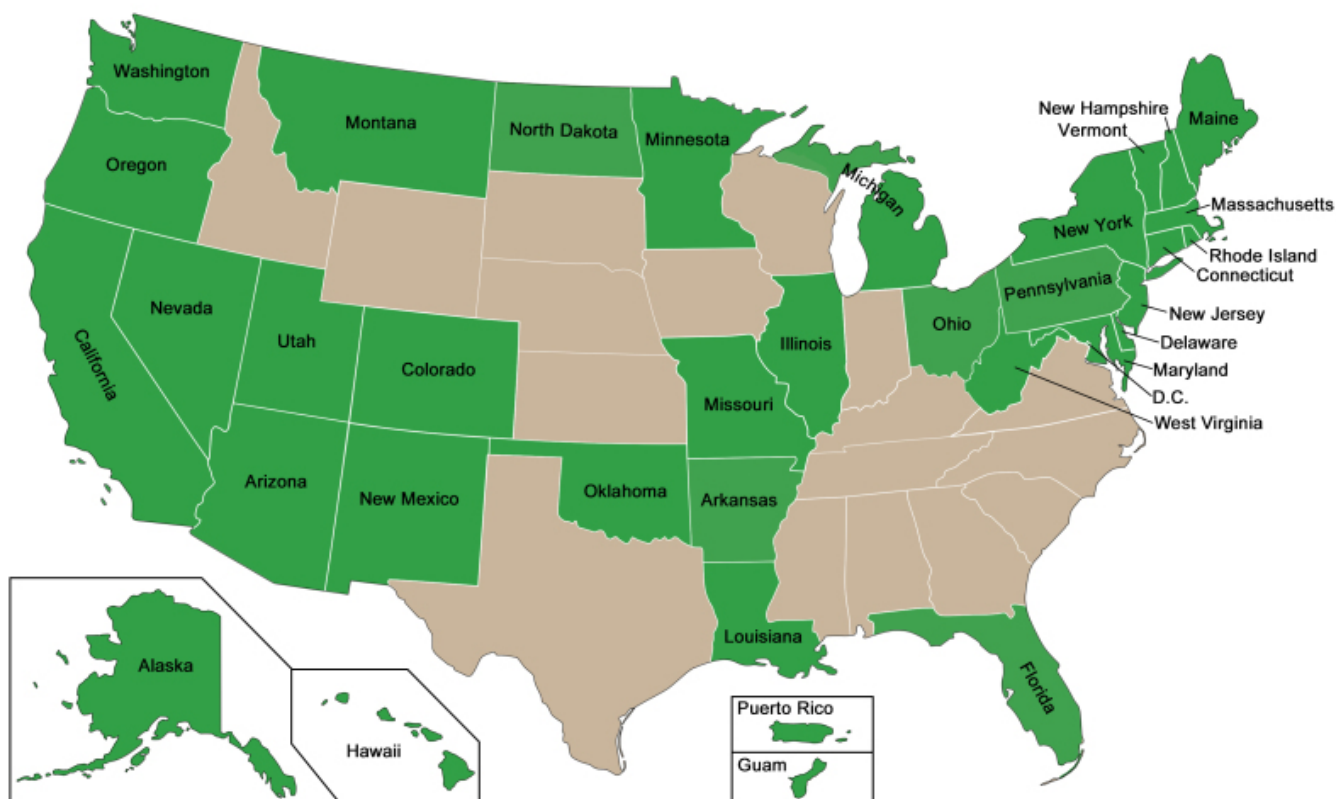

Dr. Noah Federman, who was first connected with the Hirshberg Foundation via the [3rd Annual UCLA Cannabis Research Symposium](#)

in 2019, specializes in cannabis and oncology. His clinical oncology practice uses cannabis and cannabinoid compounds as adjunctive therapies and has a keen interest in how they can help patients. After hearing his academic lecture on “Cannabis Use in Oncology” it was clear our pancreatic cancer community would benefit and appreciate hearing him present the latest information. Dr. Federman will share the science behind the anecdotal stories in this ever-emerging field.

Watch Webinar

The NIH (National Institute of Health) has created a map showing the U.S. states and territories that have approved the medical use of cannabis. Last updated: 03/23/2020

States and Territories in Which Cannabis is Legal for Medical Purposes

In addition to Dr. Noah Federman's position as Director of the Pediatric Bone and Soft Tissue Sarcoma Program at UCLA, he is a faculty member of the UCLA Cannabis Research Initiative. The [UCLA Cannabis Research Initiative](#) (UCLA-CRI) is one of the first academic programs in the world dedicated to the study of cannabis.

SPONSORS & SUPPORTERS

A very special thanks to our Sponsors & Supporters for helping ensure that these vital patient resources can be offered free-of-charge in place of our Annual Symposium.

Breaking up with Pancreatic Cancer: Survivor Stories

While scientists are continuously working to better understand and treat pancreatic cancer, more energy is also going towards integrating a holistic approach that emphasizes active patient engagement with their well-being. Progress in the lab and

through clinical trials is being made, but many patients and caregivers are still concerned with the mental attitude needed to tackle a cancer diagnosis.

We know that emotional health impacts over all well-being, so in our latest webinar, we turn to two long-term survivors who will share their tips for a wellness approach to pancreatic cancer. Wendy Hammers and Marisa Harris will explain how they learned to create the healthiest environment for themselves in order to have the best possible outcome pre-, during and post-treatment. They will discuss the importance of setting your own healthy path, tips and tools for moving forward and how taking charge can truly make a difference in the health and well-being of patients as well as their loved ones.

Wendy and Marisa met at a crucial point in Wendy's pancreatic cancer treatment. Wendy will share how their journeys intersected and the importance of her relationship with "Coach Marisa." Marisa is a 21-year, stage-4 pancreatic cancer survivor who also faced many choices the moment she was diagnosed. Her remarkable journey is an inspiration to anyone with a life-threatening health diagnosis. Marisa and Wendy will share more than just their stories, they offer the tools & tips they have both honed to lead healthy, happy lives where "cancer" is no longer center stage.

[Wendy Hammers](#) is an actress, speaker, dancer, published author, storyteller, producer, stand-up comic, foodie and creative community builder. She is also a 5-year pancreatic cancer survivor who took control early in her cancer journey to seek out healthy ways to live and to shine a positive light on this challenging time in her life. Wendy knew there had to be another component to battling cancer besides eating healthy and exercising.

[Marisa Harris](#), a life coach and long-term cancer survivor who Wendy connected with early in her treatment. In 1998, Marisa was working at a Fortune 500 company when she was diagnosed with stage-4 pancreatic cancer and given 9 months to live. Refusing to accept this death sentence, she developed and implemented an integrative multidisciplinary healing program. She learned that healing takes place on the physical, mental, emotional, and spiritual level. To this day, Marisa is healthy and cancer-free. Marisa wholeheartedly believes in the transformational power of Integrative Coaching and now devotes her life to this work. She has coached hundreds of people who are in pain, in transition, or in an emotional malaise to a place of healing, passion, and joy.

23 Years of Faithful Support Leads to Results!

Dear Hirshberg Foundation Family,

Long ago, the Hirshberg Foundation selected Never Give Up as our mantra, expressing our dedication to patients and long-standing commitment to funding early research for a cure. The message

continues to resonate with pancreatic cancer survivors, families and researchers. Our community doesn't give up! After 23 years of faithful support we have gained a better understanding of what causes this disease, we have a new standard of care, treatment options and clinical trials. This simply didn't exist before the Hirshberg Foundation was launched. **As you read about our recent accomplishments, I ask that you help us continue working towards a cancer-free future and [make a much-needed donation today](#).**

Despite the COVID-19 pandemic, we've seen robust progress from our Seed Grant researchers. They have given us extraordinary forward momentum and the results speak for themselves.

- Dr. Tzatsos has received new funds from the National Institutes of Health to continue his Seed Grant project! He has identified a loss of the protein BAP1, linking chronic pancreatitis to pancreatic cancer may present [a new tailored therapy](#).
- Our team of doctors at UCLA have been granted \$5.75 million from the National Cancer Institute [\(NIH\) to fund 3 collaborative Seed Grant projects](#) studying the role of obesity & inflammation in the development of pancreatic cancer.
- Our labs at UCLA are prioritizing pancreatic cancer while also actively helping us all in the fight against COVID-19.

Your vision for improved patient care, advances in science and medicine has allowed us to make extraordinary strides. Keeping survivors informed and empowered is a also personal priority of mine. Our new [Patient & Family Webinar Series](#) is one of many ways we're serving patients nationwide. Webinar topics include surgery, oncology, nutrition, genetics, clinical trials and 'a nurses guide' with more topics to come this year. We need your

help as we make sure our patients are never left behind. Please give what you can today so we may continue to propel forward in 2020.

With Gratitude,

Agi Hirshberg
Founder

P.s. Register for our Nationwide [Virtual LA Cancer Challenge](#) Walk/Run today to support our efforts!

Chemotherapy for Pancreatic Cancer Patients: Less is More!

Our [Patient & Family Webinar](#) series continues with a presentation on chemotherapy for pancreatic cancer patients. Dr. Isacoff will present *Chemotherapy for Pancreatic Cancer Patients: Less is More!* We are excited to have him share his findings on why lower, more frequent doses of chemotherapy may be a more patient friendly treatment regimen, with fewer side effects and better survival rates.

Dr. William H. Isacoff, who leads the [Pancreatic Cancer Center of Los Angeles](#), has earned a reputation as one of the foremost gastrointestinal oncologists within the United States. He has developed innovative treatments which have significantly extended the lives of pancreatic patients throughout the country. He has worked for decades to form better, safer and more effective treatments for patients battling pancreatic cancer and other gastrointestinal cancers.

With the use of low dose “metronomic” chemotherapy without radiation, Dr. Isacoff and the Pancreatic Surgical Team at UCLA have down staged more than 60 patients who upon initial diagnosis were felt to be inoperable. After successful “metronomic” treatment with a combination of chemotherapies, the patients were then able to become surgical candidates. Seventy-five percent of those patients were found to have lymph nodes that were uninvolved with metastatic disease as a result of the prolonged use of effective chemotherapy. Dr. Isacoff shares these promising results and more information on how lower, more frequent doses of chemotherapy may impact a patient’s outcome.
